-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

Art Unit: 1745

Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1 and 10 recite that the ends the outer electrode layer are "located on the outer sides of both side ends of said interconnector", which would imply that the ends of the outer electrode layer are in contact with the interconnector. Since the inner electrode is also in contact with the interconnector, this would imply a short circuit. This also would conflict with the recitation that the outer electrode does not oppose the curved sections of the substrate or inner electrode, since the outer electrode would have to extend around the curved sections in order to contact, and be located "on" the side ends of the interconnector.

The disclosure is objected to because of the following informalities: Drawing numerals 1a and 1b, in figure 5, are not found in the specification. Appropriate correction is required.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamashita *et al.* (US 2003/0224240) disclose a solid electrolyte fuel cell in which the ends of one electrode are tapered. Reichner (US 4,874,678), Ishihara *et al.* (US 5,185,219) and George *et al.* (US 6,423,436) disclose various tubular solid electrolyte fuel cells.

Claims 1-18 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. The prior art cited either herein or by applicant does not disclose a fuel cell with an inner electrode or substrate that has

two opposite flat surfaces and two curved surfaces, where the electrolyte, but not the outer electrode, opposes the curved surfaces.
